

PROJECT OVERVIEW

After a powerful hail storm ripped through Georgia, and left this industrial building's roof badly damaged, the team needed an immediate solution to prevent damage to interior equipment and allow them to continue production. Our team responded immediately and worked with the owner to upgrade and replace their roof. Because of the building's design, custom metal panels had to be rolled on site to meet the roof's requirements, and as a result, Stellar upgraded their roof to all the same profile and kept business interruption to a minimum.

THE STELLAR TOUCH

- » Professionally communicated damage to the insurance carrier
- » Responded and provided a roofing solution quickly to avoid internal equipment damage
- » Rolled custom metal panels on site to meet the requirements of the building's roof, eliminating unnecessary seams
- » Upgraded all panels to the same profile to provide consistency and quality across the entire building
- » Provided an innovative solution to improve the roof drainage system

CLIENT TESTIMONIAL

"We are pleased with the work that was done. This was by far the largest roofing project we have ever had and it was handled professionally by all of the staff. Thank you for a great job guys!"
